

NHS Somerset

Are you aged 75 to 79?

You can protect yourself from serious lung infection.

Every year, thousands of older people need hospital care for respiratory syncytial virus (RSV) infection.

It affects the lungs and can cause pneumonia.

RSV vaccination is the best protection, with over 75's a priority for a free NHS vaccine.

If you're aged 75 to 79 (or turned 80 after 1 September 2024) your GP surgery will contact you for an appointment.
